# Understanding your prescription drug list

## What is a prescription drug list (PDL)?

A PDL is a list of prescribed medications or other pharmacy care products or supplies chosen for their safety, cost, and effectiveness. Medications are listed by categories or classes and are placed into cost levels known as tiers. It includes both brand and generic prescription medications.

To create the list, UnitedHealthcare® is guided by the Individual and Family Plan Pharmacy Management Committee. This group reviews which medications will be covered, based on how well the drugs work, and overall value. They also make sure there are safe and covered options.

## How do I use my PDL?

You and your provider can use the PDL to help you choose the most cost-effective prescription medications. This guide tells you if a medication is generic or brand, and if special rules apply. You can reference this list when you see your provider. If your medication is not listed here, please visit [myuhc.com/exchange](https://myuhc.com/exchange) or call the Member Services number on your health plan ID card.

Some medications on your PDL have extra requirements before they can be covered. A few of the most common coverage programs are prior authorization (PA), step therapy (ST), quantity limits (QL), morphine milligram equivalent (MME) and 7-day limit (7D). We use programs like these to help make sure the medication you take is safe and effective. Check your plan documents for more information. If you want to see if a medication in one of these programs, please visit [myuhc.com/exchange](https://myuhc.com/exchange) or call the Member Services number on your health plan ID card.

- **Prior authorization (PA):** UnitedHealthcare requires you or your physician to obtain prior authorization for certain drugs to be sure the drug is most appropriate for the condition. This means that you will need to get approval from UnitedHealthcare before you fill your prescriptions. If you don't get approval, the drug may not be covered.
- **Step therapy (ST):** In some cases, UnitedHealthcare requires you to first try certain drugs to treat your medical condition before we cover another drug for that condition. Step Therapy makes sure you are filling medically appropriate and affordable medications.
- **Quantity limits (QL):** For certain drugs, UnitedHealthcare limits the amount of the drug being filled per copayment or over a certain period of time. We update quantity limits based on medical guidance and Food and Drug Administration (FDA) recommendations. This helps reduce waste and ensures medications are used appropriately.
- **Morphine milligram equivalent (MME):** Additional quantity limits may apply across all drugs in the opioid class used for the treatment of pain. This additional limit is called a cumulative morphine milligram equivalent (MME) and is designed to monitor safe dosing levels of opioids for individuals who may be taking more than 1 opioid drug for pain management. If your doctor prescribes more than this amount, or thinks the limit is not right for your situation, you or your doctor can ask the plan to cover the additional quantity.
- **7-day limit (7D):** If you have not filled an opioid prescription recently, you may be limited to a 7-day supply. This limit is intended to minimize long-term opioid use. For members who are new to the plan and have a recent history of using opioids, the limit may be overridden by the pharmacy.

## What are tiers?

Tiers are the different cost levels you pay for a medication. Each tier is assigned a cost, set by UnitedHealthcare. This determines how much you will pay when you fill a prescription at a network pharmacy.

## Can the PDL change?

Most changes in drug coverage happen on January 1, but during the year UnitedHealthcare may add or remove drugs on the PDL, move them to different cost-sharing tiers, or add or remove restrictions.

When a medication changes tiers, you may have to pay a different amount for that medication. Talk to your provider to learn about alternatives.

### About this PDL

Where differences between this document and your benefit plan exist, the benefit plan documents rule. This may not be a complete list of medications that are covered by your plan. Please review your benefit plan for full details.

## Why are some medications not covered?

A medication may not be covered under your pharmacy benefit when it works the same as or similar to another prescription or over-the-counter (OTC) medication.

## How can I get a medication not listed on the PDL covered?

You, your authorized representative or your provider can ask for a coverage request by calling the number on your health plan ID card. Once the request is received, a decision will be provided within 72 hours, unless there are exigent circumstances and an expedited review is requested, in which case a decision will be provided in 24 hours. These responses may be shorter based on state laws. If the request is denied, information will be provided describing the process to appeal that decision and request an external review.

## Medication tips

### What is the difference between brand-name and generic medications?

Generic medications contain the same active ingredients (what makes the medication work) as brand-name medications, but they often cost less.

### What if my doctor writes a brand-name prescription?

If your provider gives you a prescription for a brand-name medication, ask if a generic or lower-cost option could be right for you. Generic medications are usually your lowest-cost option.

### What if I am taking a specialty medication?

Specialty medications are for rare or complex conditions and are usually higher-cost medications. Specialty medications are indicated with SP throughout the PDL.

Please note, not all specialty medications may be available at a retail pharmacy. If you have question on how to access covered specialty medications, call the number on your health plan ID card or visit [myuhc.com/exchange](https://myuhc.com/exchange).

### Over-the-counter medications

An over-the-counter (OTC) medication may be the right treatment for some conditions. Talk to your provider about available OTC options. Even though OTC medications may not be covered by your pharmacy benefit, they may cost less than a prescription medication.

# Reading your PDL

The PDL gives you choices so you and your provider can decide your best course of treatment. In this PDL, brand-name medications are shown in UPPERCASE (for example, BREO ELLIPTA). Generic medications are shown in lowercase (for example, atorvastatin). There are two ways to find your drug within the PDL:

1. The drugs in this formulary are grouped into categories depending on the medical conditions that they are used to treat. For example, drugs used to treat an infection are generally listed under the category, Antibacterial. If you know what your drug is used for, look for the category name, then look under the category name for your drug.
2. Alphabetical Listing – if you are not sure what category to look under, you should look for your drug in the Index. The Index provides an alphabetical list of all the drugs included in this document for both brand name drugs and generic drugs. Review the Index to find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to that page listed in the Index and find the name of your drug in the first column of the list.

## Tier information

Using lower tier or preferred medications can help you pay your lowest out-of-pocket cost. Refer to your plan documents for specific Tier cost shares.

Drug Tier	Cost Share	Helpful Tips
Tier 1	\$	
Tier 2	\$\$	Drugs in lower tiers will have lower cost shares. If you are prescribed a medication on a higher tier, you should discuss with your provider if a lower tier medication may be appropriate for your condition.
Tier 3	\$\$\$	
Tier 4	\$\$\$\$	
Tier 5	\$\$\$\$\$	
HCR \$0 copay	\$0	Preventive products listed in the HCR \$0 Tier are available at zero cost.

## Drug list information

In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage requirements or limits. Your benefit plan sets how these medications may be covered for you.

PA	Prior authorization required
QL	Quantity limit
ST	Step therapy
HCR \$0 copay	HCR \$0 copay – These drugs may be available at zero cost if specific requirements are met.
SP	Specialty medication – limited to a 1-month supply per prescription.*
MME	Morphine milligram equivalent
7D	7-day limit if you have not filled an opioid prescription recently

\*Your plan may allow more than a 1-month supply. Refer to your Benefit Plan Documents.
