Policy

Overview

This policy describes reimbursement for Vitamin D testing. Claims will be reimbursed if they include one of the codes on CMS' ICD-10 diagnosis codes list that supports Vitamin D testing or one of the additional diagnosis codes identified by UnitedHealthcare Community Plan.

Reimbursement Guidelines

Per the American Association of Clinical Endocrinologists and The American College of Endocrinology, "Reasonable approaches to vitamin D assessment and treatment include an initial measurement of 25(OH)D in patients at risk of deficiency, or alternatively, vitamin D supplementation and subsequent 25(OH)D measurement 3-4 months later to assess dose adequacy."

Laboratory testing is appropriate in higher risk patients when results will be used to institute more aggressive therapy.

UnitedHealthcare Community Plan will allow four Vitamin D tests per year, when submitted with an appropriate ICD-10 diagnosis code plus the codes UnitedHealthcare has added to that list in any position. Vitamin D tests that do not include a diagnosis from the Vitamin D Testing diagnosis list will be denied.
