Return Edit	ANSAD	Procedure code <1> is not appropriate when submitted with an anesthesia modifier. Update code(s) or modifier as applicable for services rendered.	<p><u>Anesthesia Management Service</u> Anesthesia services must be submitted with a CPT anesthesia code in the range 00100-01999, excluding 01953 and 01996, and are reimbursed as time-based using the Standard Anesthesia Formula. All services reported for anesthesia management services must be submitted with the appropriate HCPCS modifiers. These modifiers identify monitored anesthesia and whether a procedure was personally performed, medically directed, or medically supervised. Consistent with CMS, UnitedHealthcare Community Plan will adjust the allowance by the modifier percentage indicated in the table policy.</p> <p>Please review the Anesthesia Policy, Professional on UnitedHealthcare Community Plans on UHCprovider.com.</p>	3/28/2019	Medicaid	Professional
Return Edit	ANSDM	Procedure code <1> is not appropriate when billed without or with an invalid modifier. Update code(s) or modifier as applicable for services rendered.	<p><u>Anesthesia Modifier Missing</u> UnitedHealthcare Community Plan's reimbursement policy for anesthesia services is developed in part using the American Society of Anesthesiologists (ASA) Relative Value Guide (RVG®), the ASA CROSSWALK®, and Centers for Medicare and Medicaid Services (CMS) National Correct Coding Initiative (NCCI) Policy manual, CMS NCCI edits and the CMS National Physician Fee Schedule. Current Procedural Terminology (CPT®) codes and modifiers and Healthcare Common Procedure Coding System (HCPCS) modifiers identify services rendered. These services may include, but are not limited to, general or regional anesthesia, Monitored Anesthesia Care, or other services to provide the patient the medical care deemed optimal. The Anesthesia Policy addresses reimbursement of procedural or pain management services that are an integral part of anesthesia services as well as anesthesia services that are an integral part of procedural services.</p> <p>All services described in this policy may be subject to additional UnitedHealthcare Community Plan reimbursement policies including but not limited to the "CCI Editing Policy." review UnitedHealthcare Community Plan's "Add-on Policy" for further details on reimbursement of CPT code 01953.</p> <p>Please review the Anesthesia Policy, Professional on UnitedHealthcare Community Plans on UHCprovider.com.</p>	5/30/2019	Medicaid	Professional

Return Edit	ANSNM	Procedure <1> is included in procedure <2> on this or a previously submitted claim. Update code(s) as applicable.	<u>Anesthesia Non Eligible Modifier</u> When duplicate (same) anesthesia codes are reported by the same or different physician or other qualified health care professional for the same patient on the same date of service, UnitedHealthcare will only reimburse the first submission of that code. However, anesthesia administration services can be rendered simultaneously by an MD and a CRNA during the same operative session, each receiving 50% of the Allowed Amount (as indicated in the Modifier Table above) by reporting modifiers QK or QY and QX. In the event an anesthesia administration service is provided during a different operative session on the same day as a previous operative session, UnitedHealthcare will reimburse one additional anesthesia administration appended with modifier 59, 76, 77, 78, 79 or XE. Return Edit	mAM	Per CMS guidelines, HCPCS Code <1> is identified as an ambulance code and requires an ambulance modifier appended. Please update as applicable.	<u>Medicare Ambulance Origin and Destination Modifiers</u> Ambulance services are covered if they are furnished to a beneficiary whose medical condition is such that use of any other means of transportation is contraindicated. The beneficiary's condition at the time of the transport is the determining factor in whether medical necessity is met. For ambulance service claims, institutional-based providers and suppliers must report an origin and destination modifier for each ambulance trip provided in HCPCS/Rates. Origin and destination modifiers used for ambulance services are created by combining two alpha characters. Each alpha character, with the exception of "X", represents an origin code or a destination code. Rejection Edit	mPI	REJECT - Per Medicare guidelines, Procedure Code describes a physician interpretation for this service and is inappropriate in Place of Service.	<u>Physician Interpretation</u> The mPI edit uses the CMS NPFS to determine eligibility of a CPT code to be split into professional and technical components. This edit will fire on all claim lines containing codes that have an indicator of 8 in the PC/TC column of the NPFS that are submitted with a TC modifier. The mPI edit identifies claim lines that contain codes that have the modifier TC appended inappropriately or that are billed with a place of service other than inpatient. The concept of professional and technical component splits (PC/TC) does not apply since these codes describe professional inpatient services. Billing of the technical component is inappropriate by the physician as the facility should be responsible for submitting it. CMS has designated place of service 21 as inpatient (CES place of service indicator is 3) and it is the only recognized place of service designation when the PC/TC indicator is 8. All other place-of-service designations are inappropriate. Return Edit	PPSCD	Procedure <1> billed on mmdyyy is not appropriate in <2> Place Of Service for the State of <3>.	<p><u>Procedure to Place of Service</u> UnitedHealthcare Community Plan follows CPT code descriptions/guidelines and HCPCS procedure code definitions/guidelines that indicate a POS in their descriptions when assigning the applicable places of service. Reimbursement Guidelines This policy addresses the appropriate places of service for certain CPT and HCPCS procedure codes. Descriptions of some CPT and HCPCS codes included in what places of service the code may be used. For example, it would not be appropriate to submit place of service as "inpatient" for a code that states, "office or outpatient visit." UnitedHealthcare Community Plan has established a list of CPT and HCPCS codes along with their appropriate places of service. For any code that is not on the list, the place of service is not limited. Note that any procedure code reported with an appropriate place of service may also be subject to other UnitedHealthcare Community Plan reimbursement policies.</p> <p>Please review the Procedure to Place of Service Reimbursement Policy – UnitedHealthcare Community Plans on UHCprovider.com for further information.</p>	10/4/2018	Medicaid	Professional

Return Edit	uGENES2	CPT codes <1> constitute a panel, not distinct services, unless indicated with the appropriate modifier. Please review and update the claim as applicable.	<p><u>Non-Molecular Diagnostics States: Testing of Multiple Genes</u></p> <p>A panel of genes is a distinct procedural service from a series of individual genes. Genes assayed on the same date of service are considered to be assayed in parallel if the result of 1 assay does not affect the decision to complete the assay on another gene, and the 2 genes are being tested for the same indication. Genes assayed on the same date of service are considered to be assayed serially when there is a reflexive decision component where the results of the analysis of 1 or more genes determines whether the results of additional analyses are reasonable and necessary. In general, 2 or more codes describing a genetic test billed on the same beneficiary on the same date may constitute a panel, and if so, the service must be billed as a single procedural service. When 2 or more codes are submitted for the same beneficiary on the same date of service, the claims processing system will reject every code submitted after the first service. However, if a lab runs more than 1 distinct procedural service on a single date of service, then the lab must use the 59 modifier with each additional service billed as an attestation that it is a distinct procedural service.</p> <p>Please review the Billing and Coding: MoIDX: Testing of Multiple Genes article on www.cms.gov.</p>	12/15/2022	Medicare	Professional

Return Edit	umDT	Per the Medicare Physician Fee Schedule, Procedure Code <1> describes a diagnostic procedure that requires a professional component modifier in this Place of service <2>.	<p><u>Medicare Diagnostic Test</u> The mDT edit uses the CMS NPFS to determine eligibility of a CPT code to be split into professional and technical components. This edit will identify codes that have an indicator of 1 in the PC/TC column of the NPFS that are submitted without modifier 26 appended with a location of inpatient hospital, outpatient hospital or skilled nursing facility. The mDT edit identifies claim lines that contain codes that do not have the modifier 26 appended appropriately when submitted with a place of service of inpatient hospital, outpatient hospital or skilled nursing facility under Medicare rules. The concept of professional and technical component splits (PC/TC) does apply to these codes that are identified by the indicator of 1 in the PC/TC column of the NPFS. When billing these services in an inpatient hospital, outpatient hospital or skilled nursing facility, only the professional component should be billed by the physician. Billing of the technical component is inappropriate by the physician as the facility should be responsible for submitting it. Modifiers 26 and TC can be used with these codes.</p> <p>Please review the Professional/Technical Component Reimbursement Policy on UHCprovider.com for further information.</p>	8/16/2018	Medicare	Professional

Review documentation to verify whether or not a more specific ICD-10-CM diagnosis code is appropriate.	<p><u>Candidiasis Unspecified Diagnosis</u> Physicians billing with Unspecified Codes for Candidiasis. Dx code: B37.9 is an unspecified code for Candidiasis. Candidiasis codes are classified by site and /or manifestation and coding should be done to the highest level of specificity per the AHA Coding Clinic Guidelines. Candidiasis is a yeast infection caused by the Candida species, usually C. albicans but also C. tropicalis and C. parapsilosis. C. albicans is found on mucosal tissues in the mouth and genital regions in about half the population and typically does not cause infection. Infection is present only when overgrowth occurs in the mouth or genital region or when the yeast is found in sites other than the mouth and genital areas. In healthy individuals this may be a result of medications, such as antibiotics, changing the natural environment of these areas. Most Candida infections are simple cases of diaper rash or vulvovaginal infection. However, Candida is also an opportunistic illness and significant systemic infection is seen among the immunosuppressed, including individuals receiving chemotherapy and those with acquired immune deficiency syndrome (AIDS). Return Edit	uVECf	Procedure Code <1> has a maximum frequency of one unit per episode of care. Please review and update the claim as applicable.	<u>Venipuncture per Episode of Care</u> Per CMS, multiple venipunctures during the same episode of care, to draw blood specimen(s), may only be billed as a single procedure with units of service equal to 1 (one), regardless of the number of attempts or veins entered. An episode of care begins when a patient arrives at a facility for treatment and terminates when the patient leaves the facility. The venipuncture may be billed by the hospital as an outpatient charge. Physicians may not generally bill for routine venipuncture in a hospital site of service.
