

## Real data, real savings, real results

Help patients at the point of  
care with PreCheck MyScript

PreCheck MyScript® is integrated into your electronic medical record (EMR) and shows patient-specific, real-time medication costs and coverage. This valuable information is provided right at the time of prescribing, directly within your workflow in your EMR system.

### Personalized to the patient

PreCheck MyScript runs a trial claim from the UnitedHealthcare system, so you get up-to-date, patient-specific benefit and prescription coverage information. You'll be able to tell your patients how much their medication will cost based on their preferred pharmacy and benefit plan coverage at that moment.

### Timely, transparent information

View and discuss medication options with your patients while they're still in your office — before the prescription is sent to the pharmacy — and potentially help them find lower-cost options they may be more likely to fill and take as prescribed.

#### The tool helps you quickly see:

- Available lower-cost options
- Options that may not require prior authorization
- Medications that aren't covered by the patient's health plan
- Medications that are listed as preferred or non-preferred

## Simplified prior authorization

Help save up to 50 minutes<sup>2</sup> by identifying medication options that don't require prior authorization, or by quickly submitting your prior authorization request right within the system.\*

Just answer a few questions and submit the request electronically — approvals are often confirmed within seconds.

## Seamless integration with EMRs

PreCheck MyScript gives you the convenience of an uninterrupted workflow during prescribing. It is integrated into several of the most common EMR platforms or through the UnitedHealthcare Provider Portal dashboard. Available EMR platforms currently include:

- DrFirst®
- athenahealth®
- NewCrop
- Allscripts®
- Cerner® (through RxRevu)
- Epic (through SureScript)

The screenshot displays the 'PreCheck MyScript - 1 of 2 Results' interface. At the top, it shows 'Patient Details' for Elizabeth Miller and 'WALGREEN'S PHARMACY' at 123 Main St, Katy, TX 77453. A message states: 'This medication is not covered under the patient's plan. Please select an alternative medication if available.' Below this, 'Searched Medication' lists 'Actoplus Met Tab XR' with a 'Prior Authorization Required' warning. 'Alternative Option(s)' lists 'Pioglit/Met Tab 15-850MG' with a 'No Prior Authorization Required' status and a cost of '\$22.00 per fill'. Navigation buttons for 'CANCEL' and 'NEXT' are at the bottom right.

## A solution that drives results

The PreCheck MyScript tool may help provide greater prescribing convenience, increased cost savings and improved medication compliance.

### Convenience

- Up to **50 minutes saved** for providers per prescription per patient by avoiding prior authorization<sup>2</sup>
- PreCheck MyScript now includes **comparative cost data** on alternative fulfillment channels, enabling providers to compare patients' medication costs at retail versus home delivery

### Cost savings

- **\$111 saved** per script fill for patients<sup>3</sup>
- **\$41 saved** per prescription per patient for providers<sup>2</sup>
- **\$415 saved** per script fill for health plans<sup>4</sup>
- **14% lower** administrative costs for pharmacies per claim<sup>4</sup>

### Compliance

- Patients are **23% more likely** to obtain medication<sup>5</sup>
- Up to **4% improved** medication adherence for diabetes, high cholesterol and high blood pressure patients<sup>6</sup>
