

Medication Sourcing Protocol - Requirements to use a participating specialty pharmacy for certain medications

For UnitedHealthcare commercial plan members

To support the provider/patient relationship, participating outpatient providers are required to obtain certain drugs from indicated specialty pharmacies unless otherwise authorized by UnitedHealthcare. The list below includes drugs that require sourcing for all outpatient places of service and drugs that only require sourcing if administered in the outpatient hospital setting. When one of these medications is appropriately obtained through the indicated specialty pharmacy, the specialty pharmacy will bill UnitedHealthcare directly for the drug under the member's medical benefit. Outpatient providers may only seek reimbursement for administering the medication. Outpatient providers may not bill the member for the medication.

Outpatient providers can contact their Network Contractor with any questions regarding the various contracts/fee schedules for each drug listed below. This protocol works in conjunction with all UnitedHealthcare policies and protocols and does not replace or supersede them.

Please note: The specialty pharmacy protocol is subject to applicable state laws and regulations and does not apply to UnitedHealthcare West, UMR, Student Resources, UnitedHealthOne and Sierra plan members.

Medication Sourcing Protocol - All Outpatient Providers

Places of Service: Outpatient Facility, Physician Office, Home, Ambulatory Infusion

The protocol does not apply to Maryland for the 8 drugs listed below. The protocol does not apply for some commercial plan members in Louisiana.

Medication name	Therapeutic class	Code	Specialty pharmacy
